Project Experiences

- One year experience with Javascript, Typescript programming languages
- Experience in using the basics of CSS, SASS, Tailwind SCSS
- Experience with React and Redux
- Solid understanding of RESTful API integrations
- Knowledge of version control system (Git)
- Developing scalable, reliable, maintainable and reusable code
- Responsive web development

Working Experiences

January 2021 – June 2021

Denk IT • Frontend Developer Intern

I supported the development team by building corporate web pages with React JS and did adjustments on the existing platforms in order to solve usability problems. Beside these activities. I have also gained experience on carrying out REST API calls.

July 2017 – September 2017

Artı Yapi • Mechanical Engineer Intern

I supported the project manager about performing quantity takeoff measurements for bidding meetings. Also I contribute to the team by creating some technical drawings with AutoCAD.

July 2016 – August 2016

May Constructing • Assistant Project Manager

In 2017 summer period, I was intern mechanical engineering for MAY Constructions. I had a chance to work in building site for the project.

Trainings

JavaScript & React Bootcamp - August 2021 - September 2021

Usability of Websites - May 2022

Education

July 2016 – January 2022

Kirikkale University • BA in Mechanical Engineering

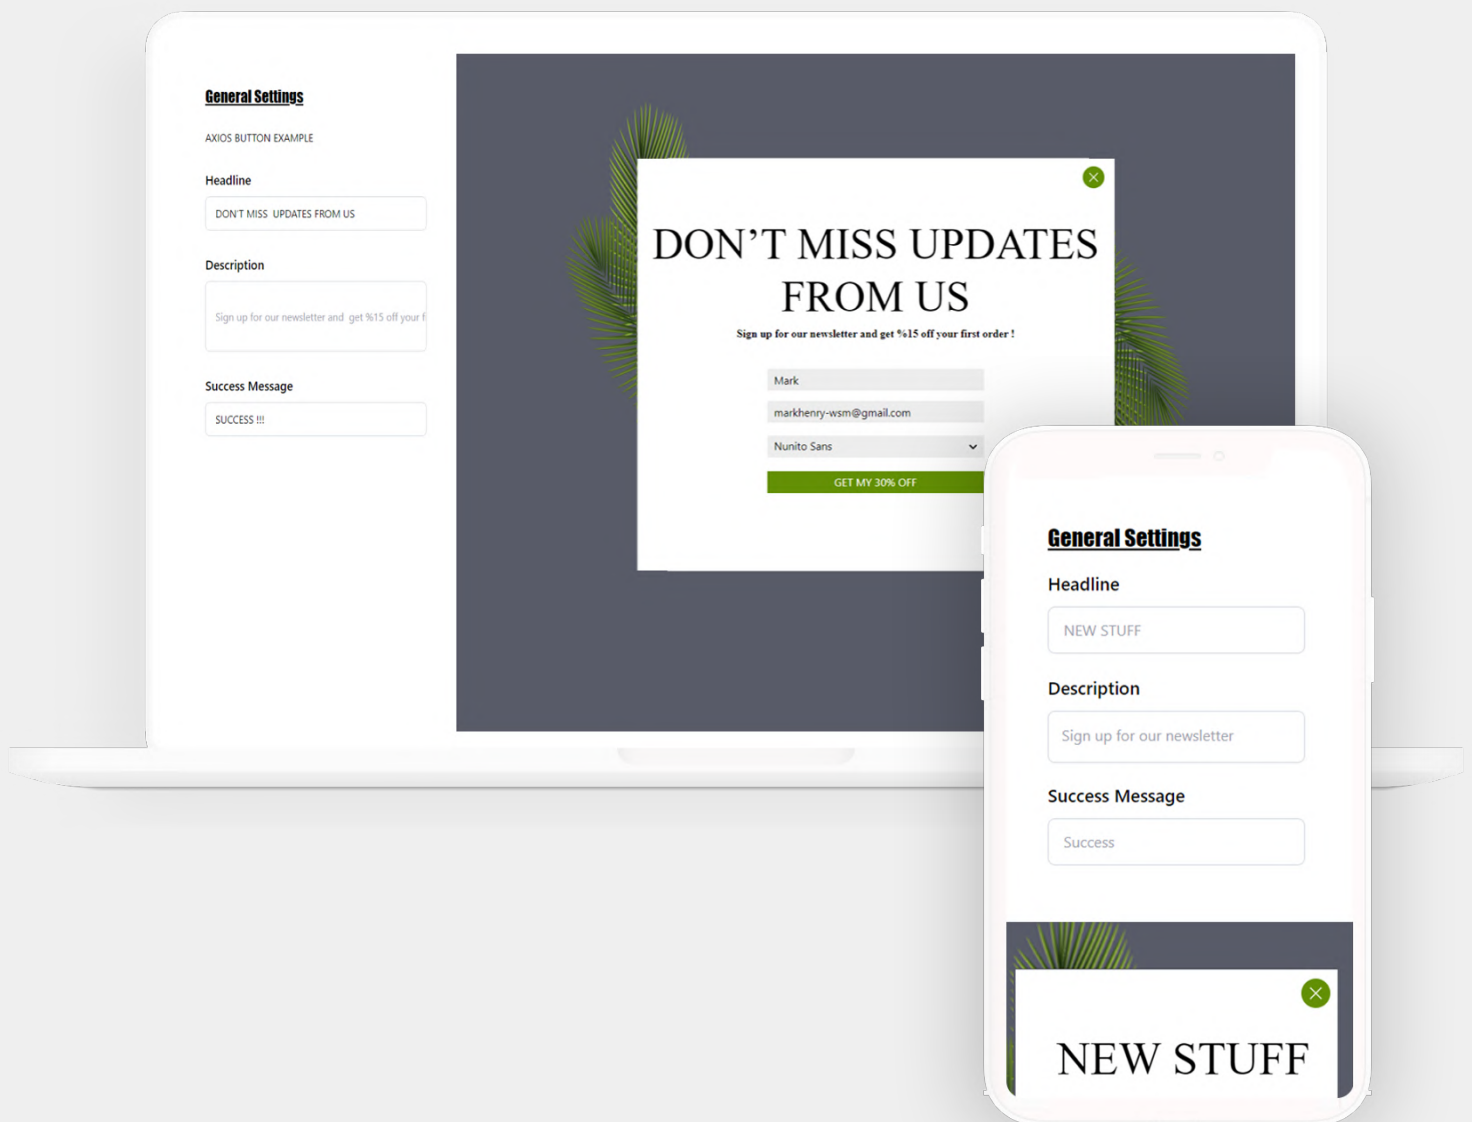

During my bachelor, i have learned the basic principles of mechanical engineering and got courses including C++ and Matlab programming languages.

1. Responsive web page design to create pop-up

B2C | It is a web page to create pop-up for your own website

Used technologies: TypeScript, React, Redux, Rest Api, Axios, LocalStorage, React Hooks

UI : CSS, SCSS, Tailwind

React Bootcamp certificate

What I have learn:

- Create dynamic web apps using the latest in web technology
- Acquire the programming skills needed to obtain a software engineering job
- Practice your skills with many large projects, exercises, and quizzes
- Master the fundamentals concepts behind React and Redux
- Become fluent in the toolchain supporting React, including NPM, Webpack, Babel, and ES6/ES2015 Javascript syntax
- Be the engineer who explains how Redux works to everyone else, because you know the fundamentals so well
- Realize the power of building reusable components

Usability of Web Sites Online Course

I have learnt the general information about the usability of websites and practical suggestions to make websites better for usability. In the first part of the training, there are general concepts such as user experience, usability and design and the relations between these concepts were mentioned. Also practical suggestions that we can collect under different headings such as home page, navigation, search, form fields are mentioned in order to improve the usability of web applications.

German B1 Certificate
